Description

This amazing Technohull GT7 is being offered brand new, it has never been used— the recorded engine hours it has are from boat shows only. She has all the needed accessories to sail on. Comes with twin YAMAHA engines, 150hp each, a must have for the performance of larger ribs. With beautiful contours, a new design and space as a 30ft rib— she is a thrill to ride. In grey tube colour, available now for immediate delivery. For a 2024 Technohull GT7 with a twin-Yamaha-150hp engine setup, the fuel consumption efficiency is approximately 0.25-0.3 gallons per nautical mile at cruising speeds (30-36 knots), improving to 0.2-0.25 g/nm. thanks to the hull's efficiency edge (its patented Dynastream technology), and at optimal conditions. At top speed (55 knots), expect 0.35-0.45 g/nm. These are educated estimates, as fuel burn varies with load, sea state, and trim. The GT7's real-world efficiency shines in its ability to maintain low consumption while planing, making it a standout for Mediterranean day trips.

Specifications:

Builder

Manufacturer: **Technohull**
Model: **GT7**
Year: **2024**
Hull Material: **Fiberglass**
Type: **Rigid Sports Inflatable, Center Consoles**

Accommodations

Dimensions
