Description

An almost brand new Axopar 37 Sun Top model of 2022, with the necessary accessories added to her, she is a really good deal to have. Available to use and try anytime. She was a former charter boat- all engine hours had been clocked by the same captain, and all services and maintenance have been followed according to factory instructions and warranty procedure. Axopar was founded and designed in Finland, manufactured in Poland —

The boat manufacturing company's quality in performance and comfort is evident from the multiple awards it has won, including: European Powerboat of the Year (by BOOTE magazine and the European Powerboat Awards jury, for its 28 series in 2015 and 37 series in 2017). The Motor Boat Awards by (Motor Boat & Yachting magazine, for the 22 Spyder in 2022 and 29 in 2025). The Best of Boats Award (by Best of Boats International jury, for the 22 Spyder in 2021). EY Entrepreneur of the Year award (by Ernst & Young (EY), for Founding Partner Jan-Erik Viitala in 2024). Great results for a company founded in 2012 and active only since 2014. Keywords and factors that define Axopar's fast-growing reputation and claim to fame are top-tier performance, engineering excellence, speed, style, comfort and luxury—All of which are benchmark features one will experience in any Axopar model, from the moment they step on deck or set sail. Despite that it is a Category B Adventure Cruiser, Axopar has received some of the most rigorous testing under perhaps the harshest weather conditions: BoatTest.com (April 2019) noted testing the older series 28 Cabin in "one of the roughest conditions [they]'ve ever tested a boat in," with the boat maintaining stability and dryness, cutting through waves without pounding. This reflects its ability to withstand significant chop and swell. However, when and if going airborne in messy chop, all Axopar boat models offer soft landings and shock absorption resisting fatigue and handling repeated wave impacts with ease.

Specifications:

Builder

Manufacturer:	Axopar	Accommodations
