Description

The Nimbus T11 is a spacious and adaptable day boat for full days on the water spent with family and friends. New design, unbelievable manoeuvrability and easy to use with many extras. Never used before, she is ready for immediate delivery from Greece, shipped to anywhere in the world

The 2023 Nimbus T11, built by Sweden's Nimbus Boats, refines a proven design, offering a 12.4m walkaround with twin Mercury, 400hp engines, a top speed of 48-50 knots, and a 241-nautical-mile range from a 224.5-gallon tank.

Its stepped deep-V hull (CE Category B certified*) ensures seaworthiness, while the spacious deck with lounge, galley, and sleeping for four blends performance, functionality, and style for discerning boaters.

*= CE Category B certification is an EU standard for recreational boats, indicating that a vessel is designed for offshore use under moderately challenging conditions. Specifically, it applies to boats built to withstand winds up to Beaufort Force 8 (34-40 knots, or 39-46 mph) and significant wave heights up to 13 feet (4 meters). For the 2023 Nimbus T11, this means it's engineered for safety and stability in open waters—like the Mediterranean or coastal routes—beyond sheltered areas, but not for extreme ocean crossings (which fall under Category A). It is a confirmation of robust construction and capability, reassuring for offshore day trips or weekend cruises.
